## G L O S S A R Y

Operating Bed. A bed that is currently set up and ready in all respects for the care of a patient. It must include supporting space, equipment and staff to operate under normal circumstances. Excluded, are nursery bassinets and transient patients' beds.

Occupied Bed. A bed assigned as of midnight to a patient, to include a patient on pass or liberty not in excess of 72 hours, and any bassinet assigned to a newborn infant whose mother has been discharged from the hospital. The definition excludes: any bed assigned to a patient subsisting out, on leave, or absent without leave, and any bed occupied by a transient patient.

Operating Bassinet. A bed designed for the care of an infant that is currently set up in the newborn nursery and ready in all respects for use. It must include support space, equipment and staff to operate under normal circumstances. Excluded are infant transporters.

Admission. An admission is the act of placing an individual under treatment or observation in a medical center or a hospital. The day of admission is the day on which the medical center or hospital makes a formal acceptance of the patient who is to be provided with room, board, and continuous nursing service in an area of the hospital where patients normally stay at least overnight. If both an admission and discharge occur on the same day, then that day is considered as a day of admission and shall be counted as one occupied bed day. The admission of a newborn is deemed to occur at the time of birth.

Outpatient Visits. Visits made to each dispensary or separate, organized clinic of a fixed medical treatment facility for medical advice, examination, diagnosis, treatment, evaluation, consultation, or counseling including visits by military patients who are excused from duty for medical reasons but who have not been admitted for inpatient care in a facility authorized beds for inpatient care and any visits made incident to complete or flight physicals.

Live Births. A live birth is the complete expulsion or extraction from its mother of a product of conception, irrespective of the duration of pregnancy which after such separation, breathes or shows any other evidence of life such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles, whether or not the umbilical cord has been cut or the placenta is attached; each such product of such a birth is considered liveborn.
